

a project of the European Union managed by the Directorate General for Regional and Urban Policy (DG REGIO) of the European Commission and supported by the European Parliament in coordination with the EU Delegation in China

# Visit to Chengdu and Shantou Innovation for Smart and Green Cities 14 – 19 March 2016

An event prepared for European delegates from the European pilot cities of Barcelona, Dublin/Fingal, Lyon, West Midlands and Andalucía Smart City Cluster in Chengdu and Shantou

# **PROGRAMME**

(as of 14.03.2016)

World Cities China is implemented by:

#### Contact:

Ms Stefanie Klein, Regional Manager GIZ, stefanie.klein@giz.de

Mr Pablo Gándara, Team Leader, pgandara@world-cities.eu, phone +49 179 9052720 or +86 132 58126971

Mr. Shi Xin, Coordinator China, shixin@world-cities.eu, phone +86-13311260965

Website: www.world-cities.eu

#### Programme Design and Logistics

The programme is designed for European representatives of local authorities from Barcelona, Dublin/Fingal, Lyon, the West Midlands and Andalucía Smart City Cluster. Delegates will be accompanied by representatives of business sectors for the corresponding pilot areas on regional and urban cooperation. The event will consist of field visits and working meetings in Chengdu and Shantou. This is the third meeting between the five cities and aims at discussing the progress of the pilot projects identified so far as well as the way forward.

#### About Chengdu and Shantou

Chengdu is the capital of Sichuan Province, located in the southwest of China and with a

population of 80 million inhabitants. The municipality has a population of approx. 14 million inhabitants and a GDP over 1 trillion RMB (2014). It is a key economic centre of Western China and one of the major agricultural production and industrial centres of the country.

Chengdu has an ambitious **low carbon** work programme, including sharp carbon intensity reduction and the increase of nonfossil energy share. Chengdu has several economic and technological development

zones, including the Chengdu Economic and Technological Development Zone (CETDZ) and the High-Tech Industrial Development Zone and the Tianfu New Area (including Tianfu Software Park).

The most innovative city development is taking place at Tianfu New Area, a planned area of 1.578 km2, 82% of which is under the jurisdiction of Chengdu. The priority of the area is to develop a circular economy and establish strategic new industries such as energy resources, new materials, energy conservation, biotechnology, and the new generation information technology and high-end equipment manufacturing.

Field visits at Tianfu New Area will include the Xinglong Lake Ecological Area, a large ecological construction project with an artificial lake at the centre and total area of over 300 hectares.

Within the World Cities programme, Chengdu is mainly cooperating with Barcelona (ES) and Dublin (IE).

Further information at <a href="http://world-cities.eu/regions/chinese-regions/chinese-regionscities/chengdu/">http://world-cities.eu/regions/chinese-regions/

<u>Shantou</u> is located in the east of Guangdong Province (440km north east from the provincial capital Guangzhou City) and has a total area of 2.064km2 with a population of 5.271.100

inhabitants. Shantou is one of 2015 Demonstration Cities (City Clusters) of "Broadband China" in Guangdong Province. The period of creating such cities is 3 years.

NDRC will give priority support to the cities in the experimentation and demonstration projects of new technologies and new services of information and communication. The main goal is to build a "Smart Shantou" as an important gateway of the information-oriented "Maritime Silk Road" in the 21st century. NDRC Shantou has therefore developed a plan to noticeably narrow the gap between urban and

rural broadband facilities and accomplish the development objective of "gigabyte for enterprises, megabytes for homes, all-round coverage of wireless broadband" in urban areas and "optical fibers reaching every village, broadband reaching every home" in rural areas to form a satisfactory environment for broadband development.

#### Environmental technologies

In November 2015, Shantou City Council launched the Leidashi Eco-Environmental Industrial Park. which involves three environmental projects with a total investment of 900 million yuan. The projects, Leidashi Green Power Plant, Leidashi Waste Sanitary Landfill expansion and a centralized disposal for urban sludge are now construction. Leidashi Green Power Plant is planned to put into operation in 2017, with more than 400,000 tons of residential garbage treatment, and about 120 million kWh into the grid, which will completely solve the problem of city garbage. The Leidashi garbage sanitary landfill expansion project is planned to be completed late 2016. The downtown sludge disposal project treats the sludge from a sewage treatment plant with mature technology of sludge drying and incineration, with a total construction scale of 600 tons per day.

#### Zhugang New Town in Huaqiao Economic Development Zone

As a prime area, Zhugang New Town aims to build a regional headquarter of eastern Guangdong and a Headquarter Economic Zone for overseas Chinese and Shantou-born businessmen all over the world. Focus of the visit will be the business opportunities for European companies from the cleantech and ICT (smart city) areas.

Within the World Cities programme, Shantou is mainly cooperating with Andalucía (ES).
