Introduction

World Cities is a project of the Directorate General for Regional and Urban Policy (DG REGIO) of the European Commission in the framework of the European Parliament's preparatory action to promote the exchange of experience and best practice between the European Union and third countries on the theme of territorial development with particular reference to sustainable urban development.

The programme is designed for delegates from Makassar visiting their European pairs in Sevilla. The programme will start with a World Cities Day Conference to be held in Barcelona on Monday 13 November, participation in a IUC-World Cities event within the Smart City Expo in Barcelona on Tuesday 14 November and the follow-up visit to Milan (15-17 November 2017).

The result of the programme will be to deepen cooperation based on the various pilot project areas identified in the first half of 2017.

About the Smart City Expo in Barcelona

The Smart City Expo World Congress (SCEWC) is the world's leading event on smart cities that will be held in Barcelona from November 14th to 16th. More than 17.000 professional visitors are expected, with over 600 exhibitors, along with high level representatives from more than 650 cities.

The Congress gathers the most relevant experts and leaders of the world's most innovative cities, companies, entrepreneurs, start-ups, research centers, initiatives and solutions, with strategies for a smarter and more sustainable urban world. At the Exhibition Area, participants showcase their latest developments, real solutions and products, with technologies that are making concrete and lasting positive impacts on the lives of millions of people.

About Sevilla

Seville is the capital and largest city of the autonomous community of Andalusia, Spain. It has a municipal population of about 703 000 and a metropolitan population of about 1.5 million, making it the fourth-largest city in Spain. Seville has developed different strategic initiatives, as well as many successful projects as best practice, including Sevilla Strategic Plan 2020, Integrated Sustainable Urban Development Strategy, Sustainable Energy Action Plan, Action Plan for Climate and for Sustainable Energy of Sevilla 2012-2020, Modernization Plan, Information and Communication Systems of Seville's City Council, Sustainable Urban Mobility Plan of Seville, RIS3 and the Sevilla Smart City Strategy. For further information, please refer to: <http://world-cities.eu/regions/2017-2018/eu-indonesia/sevilla/>

Evening; Return flight to Indonesia

Overview of Pilot Projects

Makassar – Seville

- **Smart Cities:** Exchange best practices and lessons learnt on smart cities development with a focus on IT application, traffic management and public service management.
- **Green Space:** In the sub-district Pisang Utara in the inner city of Makassar, the city council has embarked on a Green Space City Area to improve the environment for the community. Malaga has experience in waste and water management, offering environmentally sustainable solutions in this regards, including sewage management, composting & water management.
- **Waste Management:** Most of Makassar's waste goes into the landfill site of Tamangapa on the outskirts of the city. The site has reached its capacity and lacks modern facilities to sort, recycle and process waste. Existing Waste Management Systems need to be upgraded. Seville has offered to share best practices and lessons learn from its own waste management experience with a focus on environmental sustainability.
